

Hidden Hills Site Council

The Hidden Hills Site Council is a group of elected parents and staff members who help to develop, monitor, and evaluate school programs as described in the school's Single Plan for Student Achievement. This site plan helps us to focus our instructional support and intervention programs on assisting students who are working below standard in reading and/or mathematics to be successful. Site Council also monitors various resources that come to the school for student programs. Some of the examples of the kinds of money that come to the school are allocations for school improvement, GATE (gifted and talented), EL (Programs for English Learners), school safety, and sometimes state and/or federal grants for technology and other targeted programs.
